Professional Summary

Results-driven Computer Engineering undergraduate specializing in **backend architecture, microservices, and distributed systems**. Proven experience designing secure, scalable application components and REST APIs using **Python, Java, FastAPI, Spring Boot, PostgreSQL, and Docker**. Adept at integrating CI/CD pipelines and robust authentication workflows, seeking opportunities to leverage software development skills to engineer **high-performance, reliable solutions**.

Education

Bachelor of Engineering (Honours), Major in Computer Engineering
University of Sri Jayewardenepura, Sri Lanka Feb 2024 – Present
GPA: 3.8 / 4.0
Minor: High Performance Computing
Core Modules: Computer Security, Cloud Computation and Applications, Advanced Operating Systems, Parallel Programming

G.C.E. Advanced Level in Physical Science
Ananda College, Colombo 10, Sri Lanka Jul 2020 – Jan 2023
Combined Mathematics – A | Physics – A | Chemistry – B | Z-score: 1.7892

Technical Skills

Languages: Python, Java, C, C++, SQL, JavaScript, TypeScript
Backend: FastAPI, Spring Boot, Flask, REST APIs, SQLAlchemy, JWT, RBAC, WebSockets
Databases/DevOps: PostgreSQL, PostGIS, Docker, GitHub Actions, Linux, Git
Concepts: OOP, Microservices, Distributed Systems, API Design, Authentication, CI/CD

Projects

Group Project

MealBridge – Food Redistribution Platform *Dec 2025*

- Implemented the **complete Spring Boot backend** for a team platform connecting restaurants and verified volunteers through a secure donation lifecycle.
- Built **approximately 53 request mappings** across six controllers, with JWT security, PostGIS nearby search, WebSocket notifications, and a Flask Random Forest service.

Personal Projects

Student Authentication and Attendance Management System *Jul 2026*

- Designed a **three service FastAPI microservices architecture** with three PostgreSQL databases for authentication, student management, and attendance.
- Implemented **21 backend routes**, JWT authentication, RBAC, SQLAlchemy, cross service validation, Docker, and GitHub Actions CI/CD.

CertificateAuthenticator *Apr 2026*

- Built a **Spring Boot blockchain certificate system** using PostgreSQL, Web3j, Ethereum Sepolia, Solidity, JWT, and BCrypt.
- Implemented certificate upload, on-chain issuance and verification, and password protected downloads with a 10 MB upload limit.

Distributed Chat Application *Sep 2026*

- Developed an asynchronous backend foundation with **FastAPI, SQLAlchemy 2, PostgreSQL, asyncpg, and Alembic**.
- Designed a four-table relational model and implemented Argon2 password hashing, JWT authentication logic, migrations, and Pydantic validation.

Leadership

Committee Member, Computer Engineering Society (CENSOC) University of Sri Jayewardenepura

Certifications

AWS Academy Graduate – Cloud Foundations (Verify) Amazon Web Services Academy

Ethical Hacker (Verify) Cisco

SQL (Basic) Certificate (Verify) HackerRank

Problem Solving (Basic) Certificate (Verify) HackerRank

Languages

Sinhala | English
